Investment Weekly

Commentary and Statistics

- U.S. equities dipped during another week of geopolitical tensions with the Nasdaq, Dow Jones and S&P 500 all posting a loss. Gold hit a five-month high and oil was slightly up. The 10-year U.S. Treasury yield closed at approximately 2.21%.
- With 6% of S&P 500 companies having reported first quarter results, 76% have beaten earnings expectations while 59% have beaten sales expectations. According to FactSet, the first quarter blended earnings growth rate estimate for the S&P 500 is 9.2%. If the index reports earnings growth for the quarter, it will mark the highest year-over-year earnings growth for the index since Q4 2011. Applied Optoelectronics, SkyWest and Swift Transportation impressed this week; Hub Group, Fitbit and United Continental were among the disappointments.
- Geopolitical headlines included the U.S. dropping the largest non-nuclear weapon ever used in combat in Afghanistan and a report that China has deployed 150,000 troops to the North Korean border in an anticipation of a pre-emptive strike by the U.S. However, press reports also continued to highlight the tendency of markets to ignore geopolitical flare-ups.
- In terms of tax reform, there continued to be some focus on comments from Gary Cohn, the chief economic advisor to President Trump and Director of the National Economic Council, who told Bloomberg TV that he is not sure if tax reform legislation will pass by the August timeline repeatedly highlighted by Treasury Secretary Steve Mnuchin.
- The March Producer Price Index (PPI) was down 0.1% versus a flat reading expected, and followed a 0.3% increase in the prior month. Prices ex food and energy were flat versus a 0.2% increase expected, and followed a 0.3% rise the prior month. On a year-over-year basis, producer prices were

Voya Investment Management

Equity | Fixed Income | Multi-Asset Strategies & Solutions

Voya Investment Management is the asset management arm of Voya Financial, a leader in retirement services and investing. Our investment platform has been carefully built to help meet the long-term needs and goals of our clients, supported by more than 200 investment professionals. Our deep understanding of managing risk exposure and capturing unrecognized investment potential through intense fundamental research and skilled portfolio construction has delivered a consistency of results across continuously evolving market cycles. Today, we are proud to manage more than \$217 billion in assets for investors.¹

85% of our assets outperformed their benchmark or peer median on a 3-year basis.²

85% of our assets outperformed their benchmark or peer median on a 5-year basis.²

85% of the time our portfolios outperformed their benchmark on a rolling 3-year basis.³

Past performance does not guarantee future results.

¹ As of 12/31/16, Voya IM assets of \$217 billion include proprietary insurance general account assets of \$89 billion calculated on a market value basis. Voya IM assets, as reported in Voya Financial, Inc. SEC filings, include general account assets valued on a statutory book value basis and total approximately \$211 billion. ² Metrics presented use pre-determined criteria to measure each individual investment product based on its ability to either A) rank above the median of its peer category; or B) outperform its benchmark index on a gross-of-fees basis. Generally speaking, the results for unconstrained, fully-active investment products were based on relevant peer category rankings while those of "enhanced index", rules-based, risk-constrained, or client-specific investment products were based on benchmark-relative performance. Metrics are calculated on an annualized basis and includes mutual funds as well as pooled and separately-managed institutional portfolios that fall within our traditional (long-only) commercial book of business that remain open as of 12/31/16. If terminated and other accounts had been included, results may have differed from that shown. ³ Metrics are based on observations of rolling 3-year annualized returns over the last 30 months, calculated on an annualized, gross-of-fees basis, and includes mutual funds as well as pooled and separately-managed institutional portfolios that fall within our traditional long-only commercial book of business that remain open as of 12/31/16. If terminated and other accounts had been included, results may have differed from that shown. Source of performance returns and peer medians is Voya Investment Management but is based in part on data from Morningstar (mutual funds) and eVestment (institutional composites). Further detailed information regarding these calculations is available upon request.
