As of February 9, 2018

Investment Weekly

Commentary and Statistics

- It was another volatile week for global equity markets. Analysts have noted that pullbacks are normal, with 10% corrections happening once per year on average. The most recent 10% correction happened in June 2016. The yield on the 10-year U.S. Treasury note finished the period at approximately 2.83%. Ten-year yields sit near a four-year high, while the 30-year yield is near a one-year high.
- With 68% of S&P 500 companies having reported fourth-quarter results, 74% have reported positive earnings per share (EPS) while 79% have beaten sales expectations. According to FactSet, the fourth quarter blended earnings growth estimate for the S&P 500 is 14.0%. As of February 2, 2018, the forward 12-month P/E ratio for the S&P 500 stood at 16.3, just above the five-year average of 16.0 and higher than the ten-year average of 14.3. Sketchers, Urban Outfitters and Twitter impressed this week while Expedia, Canada Goose and Chipotle disappointed.
- There was little change in the general narrative around market volatility and what happens next to stocks. The press mainly focused on the resiliency of the current bull run, noting that there have been nine times since the bull market began in 2009 that equities have experienced drawdowns as severe as the current malaise and each time, the market has rebounded.
- New York Federal Reserve President Bill Dudley reiterated his view that the decline in the U.S. equity market has no economic complications, and said that the selloff so far has been “small potatoes.” He also highlighted the possibility of four rate hikes this year if economic momentum continues.

Voya Investment Management

Equity | Fixed Income | Multi-Asset Strategies & Solutions

Voya Investment Management is the asset management arm of Voya Financial, a leader in retirement services and investing. Our investment platform has been carefully built to help meet the long-term needs and goals of our clients, supported by more than 200 investment professionals. Our deep understanding of managing risk exposure and capturing unrecognized investment potential through intense fundamental research and skilled portfolio construction has delivered a consistency of results across continuously evolving market cycles. Today, we are proud to manage more than \$232 billion in assets for investors.¹

79% of our assets outperformed their benchmark or peer median on a 5-year basis.²

84% of the time our portfolios outperformed their benchmark on a rolling 3-year basis.³

86% of the time our portfolios outperformed their benchmark on a rolling 5-year basis.³

Past performance does not guarantee future results.

¹ As of 12/31/17, Voya IM assets of \$232 billion include proprietary insurance general account assets of \$90 billion calculated on a market value basis. Voya IM assets, as reported in Voya Financial, Inc. SEC filings, include general account assets valued on a statutory book value basis and total approximately \$224 billion. ² Metrics presented use pre-determined criteria to measure each individual investment product based on its ability to either A) rank above the median of its peer category; or B) outperform its benchmark index on a gross-of-fees basis. Generally speaking, the results for unconstrained, fully-active investment products were based on relevant peer category rankings while those of "enhanced index", rules-based, risk-constrained, or client-specific investment products were based on benchmark-relative performance. Metrics are calculated on an annualized basis and includes mutual funds as well as pooled and separately-managed institutional portfolios that fall within our traditional (long-only) commercial book of business that remain open as of 12/31/17. If terminated and other accounts had been included, results may have differed from that shown. Source of performance returns and peer medians is Voya Investment Management but is based in part on data from Morningstar (mutual funds) and eVestment (institutional composites). Further detailed information regarding these calculations is available upon request. ³ Metrics are based on observations of rolling 3-year or 5-year annualized returns over the last 30 months, calculated on an annualized, gross-of-fees basis, and includes mutual funds as well as pooled and separately-managed institutional portfolios that fall within our traditional long-only commercial book of business that remain open as of 12/31/17. If terminated and other accounts had been included, results may have differed from that shown. Source of performance returns is Voya Investment Management, and further detailed information regarding these calculations is available upon request.
