Investment Weekly

Commentary and Statistics

- It was a relatively flat week for U.S. equity markets following the post-election rally. The key tailwinds for stocks remain the reflation theme, positioning and better economic data. The 10-year U.S. Treasury yield closed at approximately 2.39%. Oil was flat and gold was slightly up as investors shift their attention toward earnings season.
- According to FactSet, the fourth quarter blended earnings growth rate for the S&P 500 is 3.2%. If the index reports earnings growth for the quarter, it will mark the first time the index has recorded year-over-year earnings growth for two consecutive quarters since Q4 2014 and Q1 2015. Pacific Continental, Valeant and Brookdale Senior Living impressed this week; Ethan Allen, Kohl's and Macy's were among the disappointments.
- Corporate tax reform and the repealing of Obamacare dominated a slew of political headlines during the period as the presidential inauguration approaches. President-elect Donald Trump gave his first press conference since July 2016 and pushed back against unverified allegations that Russian officials have gathered compromising information on him, as reported by BuzzFeed and CNN.
- The National Federation of Independent Business (NFIB) Index of Small Business Optimism jumped to 105.8 in December from 98.4 in November. This was ahead of the 99.6 consensus and marked the biggest monthly increase on record and the highest level since 2004.
- The report further noted that there is also evidence that higher small business optimism is leading to increased business activity, including capital investment. Last month, the NFIB said that small business optimism soared after the election on expectations that tax and regulatory headwinds will all be addressed.

Voya Investment Management

Equity | Fixed Income | Multi-Asset Strategies & Solutions

Voya Investment Management is the asset management arm of Voya Financial, a leader in retirement services and investing. Our investment platform has been carefully built to help meet the long-term needs and goals of our clients, supported by more than 200 investment professionals. Our deep understanding of managing risk exposure and capturing unrecognized investment potential through intense fundamental research and skilled portfolio construction has delivered a consistency of results across continuously evolving market cycles. Today, we are proud to manage more than \$221 billion in assets for investors.¹

85% of our assets outperformed their benchmark or peer median on a 5-year basis.²

83% of our assets outperformed their benchmark on a 5-year basis.³

85% of the time our portfolios outperformed their benchmark on a rolling 3-year basis.⁴

Past performance does not guarantee future results.

¹ As of 09/30/16, Voya IM assets of \$221 billion include proprietary insurance general account assets of \$93 billion calculated on a market value basis. Voya IM assets, as reported in Voya Financial, Inc. SEC filings, include general account assets valued on a statutory book value basis and total approximately \$208 billion. ² Metrics presented use pre-determined criteria to measure each individual investment product based on its ability to either A) rank above the median of its peer category; or B) outperform its benchmark index on a gross-of-fees basis. Generally speaking, the results for unconstrained, fully-active investment products were based on relevant peer category rankings while those of "enhanced index", rules-based, risk-constrained, or client-specific investment products were based on benchmark-relative performance. Metrics are calculated on an annualized basis and includes mutual funds as well as pooled and separately-managed institutional portfolios that fall within our traditional (long-only) commercial book of business that remain open as of 09/30/16. If terminated and other accounts had been included, results may have differed from that shown. ³ Above benchmark metrics are calculated on an annualized, gross-of-fees basis and include mutual funds as well as pooled and separately-managed institutional portfolios that fall within our traditional (long-only) commercial book of business that remain open as of 09/30/16. If terminated and other non-discretionary and special purpose accounts had been included, results may have differed from that shown. ⁴ Metrics are based on observations of rolling 3-year annualized returns over the last 30 months, calculated on an annualized, gross-of-fees basis, and includes mutual funds as well as pooled and separately-managed institutional portfolios that fall within our traditional long-only commercial book of business that remain open as of 09/30/16. If terminated and other accounts had been included, results may have differed from that shown. Source of performance returns and peer medians is Voya Investment Management but is based in part on data from Morningstar (mutual funds) and eVestment (institutional composites). Further detailed information regarding these calculations is available upon request.
