Investment Weekly

Commentary and Statistics

- Stocks close at all time highs demonstrating resilience in the face of incessant political drama. Oil prices slid, giving back much of last week's gains; gold was up modestly. The yield on the 10-year U.S. Treasury note fell to about 2.16% on soft hiring news.
- Nonfarm payrolls reported 138,000 new jobs in May, below expectations, even as unemployment reached a 16-year low of 4.3% and underemployment dropped to 8.4% from 8.6% in April. Hourly earnings came in at 2.5%, undershooting expectations by 0.1%.
- U.S. consumer spending accelerated 0.4% in April compared to March, the fastest pace in four months, indicating that the U.S. economy is rebounding after a slow first quarter. Personal income rose 0.4% in April. The personal saving rate held steady in April at 5.3%.
- The U.S. trade deficit increased by 5.2% in April, to \$47.6 billion, more than economists' expectations of \$46.2 billion. Imports rose 0.8% while exports fell 0.3%. The strong U.S. dollar was cited as a cause of the increase.
- The closely watched ISM index of U.S. manufacturing activity inched up to 54.9 in May from 54.8 in April. A reading above 50 indicates expansion. Readings for each month of 2017 have been higher than any monthly readings in the past two years.
- Eurozone annual inflation fell from 1.9% in April to 1.4% in May, more sharply than expected. The disappointment came despite a drop in the jobless rate to a seven-year low. The two reports are likely to make the European Central Bank more reluctant to quickly unwind its stimulus programs.

Source: FactSet

- The European Commission's Economic Sentiment Indicator fell to 109.2 in May from 109.7 in April. Economists had expected business confidence to rise to 110.0 after centrist Emmanuel Macron defeated anti-euro candidate Marine Le Pen in France's presidential elections.
- China's official manufacturing PMI registered 51.2 in May, unchanged from April. The index, considered a gauge of business sentiment, has remained in expansion territory for 10 consecutive months. Economists said the May figure points to an economy slowing less rapidly than expected.

Voya Investment Management

Equity | Fixed Income | Multi-Asset Strategies & Solutions

Voya Investment Management is the asset management arm of Voya Financial, a leader in retirement services and investing. Our investment platform has been carefully built to help meet the long-term needs and goals of our clients, supported by more than 200 investment professionals. Our deep understanding of managing risk exposure and capturing unrecognized investment potential through intense fundamental research and skilled portfolio construction has delivered a consistency of results across continuously evolving market cycles. Today, we are proud to manage more than \$219 billion in assets for investors.¹

82% of our assets outperformed their benchmark or peer median on a 3-year basis.²

87% of our assets outperformed their benchmark or peer median on a 5-year basis.²

86% of the time our portfolios outperformed their benchmark on a rolling 3-year basis.³

Past performance does not guarantee future results.

¹ As of 03/31/17, Voya IM assets of \$219 billion include proprietary insurance general account assets of \$89 billion calculated on a market value basis. Voya IM assets, as reported in Voya Financial, Inc. SEC filings, include general account assets valued on a statutory book value basis and total approximately \$213 billion. ² Metrics presented use pre-determined criteria to measure each individual investment product based on its ability to either A) rank above the median of its peer category; or B) outperform its benchmark index on a gross-of-fees basis. Generally speaking, the results for unconstrained, fully-active investment products were based on relevant peer category rankings while those of "enhanced index", rules-based, risk-constrained, or client-specific investment products were based on benchmark-relative performance. Metrics are calculated on an annualized basis and includes mutual funds as well as pooled and separately-managed institutional portfolios that fall within our traditional (long-only) commercial book of business that remain open as of 03/31/17. If terminated and other accounts had been included, results may have differed from that shown. ³ Metrics are based on observations of rolling 3-year annualized returns over the last 30 months, calculated on an annualized, gross-of-fees basis, and includes mutual funds as well as pooled and separately-managed institutional portfolios that fall within our traditional long-only commercial book of business that remain open as of 03/31/17. If terminated and other accounts had been included, results may have differed from that shown. Source of performance returns and peer medians is Voya Investment Management but is based in part on data from Morningstar (mutual funds) and eVestment (institutional composites). Further detailed information regarding these calculations is available upon request.
