Investment Weekly

Commentary and Statistics

- Global stock markets turned in another mixed week, with the U.S. markets posting gains and some international markets off. High volatility persisted — attributed to trade tensions ahead of the G7 economic summit, and positioning for a widely expected interest-rate hike after next week's Federal Open Market Committee meeting. U.S. oil prices were flat for the week, held in check by abundant domestic supply. As investors awaited the FOMC's rate decision next week, gold prices moved up and the 10-year U.S. Treasury yield rose to about 2.95%.
- The April Job Openings and Labor Turnover (JOLTS) report came in at 6.7 million openings, higher than expected and greater than the 6.3 million unemployed in the labor market. Hires and separations changed little at 5.6 million and 5.4 million, respectively. Within separations, the quits rate was unchanged at 2.3% and the layoffs and discharges rate increased to 1.2%.
- The IHS Markit U.S. Composite PMI came in at 56.6 in May, significantly above expectations of 55.7, following April's reading of 54.9. The reading was the result of strong growth in both the services and manufacturing sectors.
- The eurozone economy expanded 0.4% in 1Q18, following a 0.7% increase for 4Q17. Though household consumption and fixed investment continued to rise, external demand fell and accounted for the declining rate.
- Sentix reported that eurozone investor confidence came in at 9.3 for June, far below expectations of 18.5. Assessments of the current situation and six-month expectations both fell, resulting in the weakest reading since October 2016. Sentix attributed the fall mainly to Italy and trade concerns.

Source: FactSet

- The Japanese economy contracted 0.2% for 1Q18, after expanding at a 0.1% rate in 4Q17. The contraction was due to a decline in private investment and stagnating household consumption. It was the first contraction in two years. Investors had been expecting zero growth.
- Nikkei Japan Composite PMI eased to 51.7 in May, down from a six-month high in April. After starting the second quarter well, the softer number pointed to slower but still resilient growth, easing concerns about an economic slowdown after the disappointing 1Q18 GDP results.

Bond Rates (%) as of:	06/08/18	06/01/18	12/31/17	03/08/18

Voya Investment Management

Equity | Fixed Income | Multi-Asset Strategies & Solutions

Voya Investment Management is the asset management arm of Voya Financial, a leader in retirement services and investing. Our investment platform has been carefully built to help meet the long-term needs and goals of our clients, supported by more than 200 investment professionals. Our deep understanding of managing risk exposure and capturing unrecognized investment potential through intense fundamental research and skilled portfolio construction has delivered a consistency of results across continuously evolving market cycles. Today, we are proud to manage more than \$227 billion in assets for investors.¹

79% of our assets outperformed their benchmark or peer median on a 5-year basis.²

86% of the time our portfolios outperformed their benchmark on a rolling 5-year basis.³

87% of the time our portfolios outperformed their benchmark on a rolling 7-year basis.³

Past performance does not guarantee future results.

¹As of 03/31/18. Voya Investment Management assets are calculated on a market value basis and include proprietary insurance general account assets of \$87 billion. ²Metrics presented use pre-determined criteria to measure each individual investment product based on its ability to either A) rank above the median of its peer category; or B) outperform its benchmark index on a gross-of-fees basis. Generally speaking, the results for unconstrained, fully-active investment products were based on relevant peer category rankings while those of "enhanced index", rules-based, risk-constrained, or client-specific investment products were based on benchmark-relative performance. Metrics are calculated on an annualized basis and includes mutual funds as well as pooled and separately-managed institutional portfolios that fall within our traditional (long-only) commercial book of business that remain open as of 03/31/18. If terminated and other accounts had been included, results may have differed from that shown. Source of performance returns and peer medians is Voya Investment Management but is based in part on data from Morningstar (mutual funds) and eVestment (institutional composites). Further detailed information regarding these calculations is available upon request. ³Metrics are based on observations of rolling 5-year or 7-year annualized returns over the last 30 months, calculated on an annualized, gross-of-fees basis, and includes mutual funds as well as pooled and separately-managed institutional portfolios that fall within our traditional long-only commercial book of business that remain open as of 03/31/18. If terminated and other accounts had been included, results may have differed from that shown. Source of performance returns is Voya Investment Management, and further detailed information regarding these calculations is available upon request.
