## Investment Weekly

### Commentary and Statistics

- Oil lost ground during the week as gold and U.S. equities experienced modest gains. The S&P 500 was up for the second consecutive week with the Nasdaq and Dow Jones both also rising. The 10-year U.S. Treasury yield closed at approximately 2.14%.
- Oil came under pressure during the period with prices hitting their lowest levels since mid-November. However, there was nothing specific behind the latest weakness. Commentary focused on the usual suspects, including the persistent global inventory glut and rising production from Nigeria and Libya.
- Fedspeak included St Louis Federal Reserve (Fed) President James Bullard commenting that current data readings suggest the Fed can wait and see how the economy develops before making any further adjustments to rates. He noted that the U.S. economy remains in a low-growth, low-inflation environment for which the current level of the policy rate may be appropriate over the forecast horizon.
- New York Fed President William Dudley stated that the current economic expansion has a long way to go and, like Fed Chair Janet Yellen, expressed confidence that inflation will soon get back to the central bank's 2% target. He added that halting the Fed's tightening cycle could imperil the economy and potentially cause a recession.
- Existing-home sales for May rose 1.1% month-over-month to at 5.62M seasonally adjusted annual rate (SAAR), better than April's 5.57M reading and consensus for 5.54M.

Index Prices (\$)

Source: FactSet

- The U.S. flash manufacturing purchasing manager's index (PMI) fell to 52.1 in June from 52.7 in the May's final reading, this was below the 53.0 consensus and the lowest level in nine months. The release noted the weaker reading was largely a function of softer rates of output and new business growth, which more than offset stronger contributions from job creation and inventories.
- The U.S. flash services PMI fell to 53.0 in June from 53.6 in May, which was also the consensus. It was the lowest reading in three months. The release highlighted a robust and accelerated increase in new orders (the strongest since January) which helped drive a further pickup in job creation following the recent April low.

Bond Rates (%) as of:	06/23/17	06/16/17	12/31/16	03/23/17
U.S. Federal Funds Target Rate	1.25	1.25	0.75	1.00

# Voya Investment Management

## Equity | Fixed Income | Multi-Asset Strategies & Solutions

Voya Investment Management is the asset management arm of Voya Financial, a leader in retirement services and investing. Our investment platform has been carefully built to help meet the long-term needs and goals of our clients, supported by more than 200 investment professionals. Our deep understanding of managing risk exposure and capturing unrecognized investment potential through intense fundamental research and skilled portfolio construction has delivered a consistency of results across continuously evolving market cycles. Today, we are proud to manage more than \$219 billion in assets for investors.<sup>1</sup>

**82%** of our assets outperformed their benchmark or peer median on a 3-year basis.<sup>2</sup>

**87%** of our assets outperformed their benchmark or peer median on a 5-year basis.<sup>2</sup>

**86%** of the time our portfolios outperformed their benchmark on a rolling 3-year basis.<sup>3</sup>

### Past performance does not guarantee future results.

<sup>1</sup> As of 03/31/17, Voya IM assets of \$219 billion include proprietary insurance general account assets of \$89 billion calculated on a market value basis. Voya IM assets, as reported in Voya Financial, Inc. SEC filings, include general account assets valued on a statutory book value basis and total approximately \$213 billion. <sup>2</sup> Metrics presented use pre-determined criteria to measure each individual investment product based on its ability to either A) rank above the median of its peer category; or B) outperform its benchmark index on a gross-of-fees basis. Generally speaking, the results for unconstrained, fully-active investment products were based on relevant peer category rankings while those of "enhanced index", rules-based, risk-constrained, or client-specific investment products were based on benchmark-relative performance. Metrics are calculated on an annualized basis and includes mutual funds as well as pooled and separately-managed institutional portfolios that fall within our traditional (long-only) commercial book of business that remain open as of 03/31/17. If terminated and other accounts had been included, results may have differed from that shown. <sup>3</sup> Metrics are based on observations of rolling 3-year annualized returns over the last 30 months, calculated on an annualized, gross-of-fees basis, and includes mutual funds as well as pooled and separately-managed institutional portfolios that fall within our traditional long-only commercial book of business that remain open as of 03/31/17. If terminated and other accounts had been included, results may have differed from that shown. Source of performance returns and peer medians is Voya Investment Management but is based in part on data from Morningstar (mutual funds) and eVestment (institutional composites). Further detailed information regarding these calculations is available upon request.
