## Investment Weekly

### Commentary and Statistics

- Stocks markets were mixed for the week, mostly down in the United States but up in Asia and Europe. Fears of rising inflation caused a jump in the widely watched 10-year U.S. Treasury yield, which triggered a midweek sell-off of stocks. The downdraft notwithstanding, U.S. small caps extended their gains to an all-time record. Oil prices were up for the week, gold fell despite inflation concerns. The 10-year U.S. Treasury hit 3.12% before finishing the week at 3.06%.
- Trade issues remained at the heart of the market's conversation; tensions with China eased but pessimism arose about a near-term NAFTA deal. On the geopolitical front, the U.S. agreed to cancel a joint military exercise with South Korea ahead of next month's summit with North Korea.
- U.S. retail sales for April grew 0.3% over March and were up 4.7% year-over-year. The monthly figure met expectations but was down from March's 0.6% rate. Consumers spent across a broad range of categories — food and beverage stores and clothing and accessories retailers saw the largest gains since 2017.
- The New York Federal Reserve's May Empire Manufacturing Survey rose to 20.1 from April's 15.8. New orders were better, but the shipments indicator changed little. The Philadelphia Fed manufacturing gauge rose to 34.4 in May from 23.2 in April. Respondents noted increases in new orders and shipments.
- The NAHB Housing Market Index was up to 70 for May from April's 68, marking the first increase since December 2017. The report noted solid fundamentals — a boon to demand — but also record lumber prices, which hurt builders' profits and made home prices challenging for first-time buyers.

Source: FactSet

- U.S. industrial output rose 0.7% in April, the third straight month of gains, and was up 3.5% year over year. Eurozone IP rose 0.5% in March, rising 3.0% YoY. China's IP rose 0.6% in April and was up 7.0% YoY.
- Eurozone GDP grew 0.4% in 1Q18, below 0.7% in 4Q17. Growth slowed in Germany and France, was flat in Italy and Spain. March YoY growth was 2.5%, perhaps an excuse for the European Central Bank to justify further delay in unwinding QE.

Bond Rates (%) as of:	05/18/18	05/11/18	12/31/17	02/16/18

Today, we are proud to manage more than \$227 billion in assets for investors.<sup>1</sup>

**79%** of our assets outperformed their benchmark or peer median on a 5-year basis.<sup>2</sup>

**86%** of the time our portfolios outperformed their benchmark on a rolling 5-year basis.<sup>3</sup>

**87%** of the time our portfolios outperformed their benchmark on a rolling 7-year basis.<sup>3</sup>

### Past performance does not guarantee future results.

<sup>1</sup> As of 03/31/18, Voya IM assets of \$227 billion include proprietary insurance general account assets of \$87 billion calculated on a market value basis. Voya IM assets, as reported in Voya Financial, Inc. SEC filings, include general account assets valued on a statutory book value basis and total approximately \$222 billion. <sup>2</sup> Metrics presented use pre-determined criteria to measure each individual investment product based on its ability to either A) rank above the median of its peer category; or B) outperform its benchmark index on a gross-of-fees basis. Generally speaking, the results for unconstrained, fully-active investment products were based on relevant peer category rankings while those of "enhanced index", rules-based, risk-constrained, or client-specific investment products were based on benchmark-relative performance. Metrics are calculated on an annualized basis and includes mutual funds as well as pooled and separately-managed institutional portfolios that fall within our traditional (long-only) commercial book of business that remain open as of 03/31/18. If terminated and other accounts had been included, results may have differed from that shown. Source of performance returns and peer medians is Voya Investment Management but is based in part on data from Morningstar (mutual funds) and eVestment (institutional composites). Further detailed information regarding these calculations is available upon request. <sup>3</sup> Metrics are based on observations of rolling 5-year or 7-year annualized returns over the last 30 months, calculated on an annualized, gross-of-fees basis, and includes mutual funds as well as pooled and separately-managed institutional portfolios that fall within our traditional long-only commercial book of business that remain open as of 03/31/18. If terminated and other accounts had been included, results may have differed from that shown. Source of performance returns is Voya Investment Management, and further detailed information regarding these calculations is available upon request.
