Investment Weekly

Commentary and Statistics

- On Memorial Day we honor those in the military who made the ultimate sacrifice for America.
- U.S. stocks rallied strongly on the week, bouncing back from last week's wavering. Asian and European stocks gained slightly, as did gold. Oil sold off after an OPEC meeting produced no breakthrough to reduce oversupply, but then rallied for a solid gain. The yield on the 10-year U.S. Treasury increased slightly, ending the week at 2.25%.
- Q1 GDP was revised up to a 1.2% annual rate from the 0.7% advance estimate, better than expected. Nonresidential fixed investment and personal consumption expenditures increased more than previously estimated.
- U.S. durable goods orders disappointed in April, declining 0.7% versus a March gain of 2.3% but better than an expected 1.5% contraction.
- The University of Michigan's final reading of May consumer sentiment was 97.1, up slightly versus April's final reading. The index has risen 2.5% since May 2016.
- Inflation expectations, which the Federal Reserve closely monitors, were little changed between April and May. While one-year expectations rose in May to 2.6%, up from 2.5% the month before, five-year inflation expectations held steady at 2.4%.
- The U.S. Census Bureau and the Department of Housing and Urban Development reported that new home sales rose to a seasonally adjusted annual rate of 569,000 in April, which was significantly below the March rate of 642,000 but slightly above April 2016. The median home price fell 3% as supply rose.
- The U.S. Composite PMI Output Index measured a modest rebound of business activity growth in May, pointing to the strongest upturn in U.S. private sector output since February.

Source: FactSet

- The minutes of the Federal Open Market Committee's (FOMC) May meeting showed Fed officials expected that it would "soon be appropriate" to raise short-term interest rates. Markets have interpreted this to mean the Fed will make its next move in June, likely with another move later in the year.
- The FOMC minutes further revealed the Fed is moving toward a consensus on how to start shrinking its holdings of Treasury and mortgage securities. Under the approach discussed, later this year the Committee would allow gradually increasing amounts of those securities to mature without reinvesting the proceeds.

Voya Investment Management

Equity | Fixed Income | Multi-Asset Strategies & Solutions

Voya Investment Management is the asset management arm of Voya Financial, a leader in retirement services and investing. Our investment platform has been carefully built to help meet the long-term needs and goals of our clients, supported by more than 200 investment professionals. Our deep understanding of managing risk exposure and capturing unrecognized investment potential through intense fundamental research and skilled portfolio construction has delivered a consistency of results across continuously evolving market cycles. Today, we are proud to manage more than \$219 billion in assets for investors.¹

82% of our assets outperformed their benchmark or peer median on a 3-year basis.²

87% of our assets outperformed their benchmark or peer median on a 5-year basis.²

86% of the time our portfolios outperformed their benchmark on a rolling 3-year basis.³

Past performance does not guarantee future results.

¹ As of 03/31/17, Voya IM assets of \$219 billion include proprietary insurance general account assets of \$89 billion calculated on a market value basis. Voya IM assets, as reported in Voya Financial, Inc. SEC filings, include general account assets valued on a statutory book value basis and total approximately \$213 billion. ² Metrics presented use pre-determined criteria to measure each individual investment product based on its ability to either A) rank above the median of its peer category; or B) outperform its benchmark index on a gross-of-fees basis. Generally speaking, the results for unconstrained, fully-active investment products were based on relevant peer category rankings while those of "enhanced index", rules-based, risk-constrained, or client-specific investment products were based on benchmark-relative performance. Metrics are calculated on an annualized basis and includes mutual funds as well as pooled and separately-managed institutional portfolios that fall within our traditional (long-only) commercial book of business that remain open as of 03/31/17. If terminated and other accounts had been included, results may have differed from that shown. ³ Metrics are based on observations of rolling 3-year annualized returns over the last 30 months, calculated on an annualized, gross-of-fees basis, and includes mutual funds as well as pooled and separately-managed institutional portfolios that fall within our traditional long-only commercial book of business that remain open as of 03/31/17. If terminated and other accounts had been included, results may have differed from that shown. Source of performance returns and peer medians is Voya Investment Management but is based in part on data from Morningstar (mutual funds) and eVestment (institutional composites). Further detailed information regarding these calculations is available upon request.
