Investment Weekly

Commentary and Statistics

- U.S. equities crept up during the week while October consumer confidence registered at 125.9, its highest level since December 2000. Oil and gold also finished the period higher and the 10-year U.S. Treasury yield closed at approximately 2.34%.
- With over 80% of S&P 500 companies reporting third-quarter results, 74% have beaten earnings expectations while 66% have beaten sales expectations. According to FactSet, the third-quarter blended earnings growth rate stood at 5.9%, up from 4.7% last week. Molina Healthcare, Apple and Sprint impressed this week; Pandora, Cheesecake Factory and Pitney Bowes were among the disappointments.
- The Federal Open Market Committee (FOMC) meeting left interest rates unchanged, as generally expected. The statement contained few notable changes. The economic assessment was somewhat more upbeat, noting that the labor market has continued to strengthen and economic activity has been “rising at a solid rate” despite hurricane-related disruptions. There were also no meaningful changes in inflation language despite another soft CPI print for September.
- The House GOP released the text of H.R. 1, the Tax Cuts and Jobs Act. In most respects, the bill came in largely as had been expected after the debates of the last several weeks. It proposes a permanent cut to the corporate tax to 20% with no phase-in period, cuts taxes on qualifying pass-through businesses to 25% and lowers individual income-taxes. It also simplifies the bracket structure, increases the standard deduction and begins eliminating the estate tax after 2024.

Source: FactSet

- October consumer confidence registered 125.9. This was better than consensus for 121.0 and higher than September's upwardly revised 120.6 (previously 119.8). The release noted that consumers were considerably more upbeat about the short-term outlook, with improving business conditions the primary driver.
- Nonfarm payrolls increased 261K in October following an upwardly revised 18K gain in the prior month. This was below the 310K consensus, as the Street expected a bigger post-storm rebound following the hurricanes. However, the 162K average over the last three months was still seen as solid and remained well above levels that Fed officials have said are necessary to hold the unemployment rate.

Voya Investment Management

Equity | Fixed Income | Multi-Asset Strategies & Solutions

Voya Investment Management is the asset management arm of Voya Financial, a leader in retirement services and investing. Our investment platform has been carefully built to help meet the long-term needs and goals of our clients, supported by more than 200 investment professionals. Our deep understanding of managing risk exposure and capturing unrecognized investment potential through intense fundamental research and skilled portfolio construction has delivered a consistency of results across continuously evolving market cycles. Today, we are proud to manage more than \$230 billion in assets for investors.¹

79% of our assets outperformed their benchmark or peer median on a 5-year basis.²

84% of the time our portfolios outperformed their benchmark on a rolling 3-year basis.³

88% of the time our portfolios outperformed their benchmark on a rolling 5-year basis.³

Past performance does not guarantee future results.

¹ As of 09/30/17, Voya IM assets of \$230 billion include proprietary insurance general account assets of \$91 billion calculated on a market value basis. Voya IM assets, as reported in Voya Financial, Inc. SEC filings, include general account assets valued on a statutory book value basis and total approximately \$222 billion. ² Metrics presented use pre-determined criteria to measure each individual investment product based on its ability to either A) rank above the median of its peer category; or B) outperform its benchmark index on a gross-of-fees basis. Generally speaking, the results for unconstrained, fully-active investment products were based on relevant peer category rankings while those of "enhanced index", rules-based, risk-constrained, or client-specific investment products were based on benchmark-relative performance. Metrics are calculated on an annualized basis and includes mutual funds as well as pooled and separately-managed institutional portfolios that fall within our traditional (long-only) commercial book of business that remain open as of 09/30/17. If terminated and other accounts had been included, results may have differed from that shown. Source of performance returns and peer medians is Voya Investment Management but is based in part on data from Morningstar (mutual funds) and eVestment (institutional composites). Further detailed information regarding these calculations is available upon request. ³ Metrics are based on observations of rolling 3-year or 5-year annualized returns over the last 30 months, calculated on an annualized, gross-of-fees basis, and includes mutual funds as well as pooled and separately-managed institutional portfolios that fall within our traditional long-only commercial book of business that remain open as of 09/30/17. If terminated and other accounts had been included, results may have differed from that shown. Source of performance returns is Voya Investment Management, and further detailed information regarding these calculations is available upon request.
